

# HR-SERIES

The Kabola HR-series consists of reliable oil-fired central heating systems supplying 10, 14 and 20kW.

The HR series can be supplied as central heating, as calorifier and as combi.

## KABOLA HR-SERIES: ALWAYS THE RIGHT TEMPERATURE

Kabola HR-series

Due to their versatile deployability and silent, fully automatic operation, these boilers are suitable for sailing and motor yachts.

The HR-series is predominantly used for long or permanent stays on board. A central heating installation with radiators, floor heating or hot air and air-conditioning systems can be heated by the HR series.

*Suitable for heating motor yachts, sailing ships, campers, horse trucks, chalets and even (holiday) homes.*

In order to compose an optimum heating system with accompanying central heating boiler, it is important to calculate the **exact capacity**. The capacity is determined by the volume of the rooms on board, the ship's insulation values and the user's requirements. The sailing season and the area where the ship will sail are also very important. Make sure you are properly advised by a Kabola specialist!
