Drawer 16 Black

Drawer 16 Black: Elegance drawer refrigerator, compact, versatile with black finish

This product is versatile, as it can be used both as a refrigerator and as a freezer (down to -6°C). The stainless steel door is painted black, while the guides are made of AISI 304 stainless steel. Equipped with a Secop BD 1.4F compressor, it requires minimal installation space, making it ideal for confined spaces. With a volume of 16 liters and a weight of 13 kg, its dimensions are compact: 380 x 250 x 540 mm. The Secop BD 1.4F compressor, ventilated, silent and highly efficient, operates at 12/24V. The Easy Fix system facilitates installation, while the small dimensions make it the smallest and lightest drawer refrigerator available on the market. Its simple and intuitive digital interface matches perfectly with the elegant design of the Elegance line, appreciated for its innovative features. If the compressor is installed separately, the depth of the product is only 440 mm.
