SLIM 70

The new Slim range is designed to promote installation on vehicles with small interiors. Its vertical development allows for large internal space similar to a domestic refrigerator.

Slim 70 has 70-litre capacity and is fitted with a LED display with Power Saving and Silent Night modes, customised door panel with reversible opening, and a handle with a lock for ensuring ventilation when the fridge is off. The easy-fix system allows a simpler and faster built in installation than the traditional system.

Technical features

Capacity (L)	70
Net weight (kg)	20
Voltage (V)	DC 12, DC 24
Refrigerant gas	R600a
Certifications	CE, E-Mark, EMC

Dimensions (HxWxD) (mm)	822x420x400
Consumption (kWh/24h)	0,290
Power absorption (W)	38
Climate class	Т
